House Ornament Instructions

Body of House

Roof

Base

Note for teachers:

The template is laid out so you can print two from a page. You can print on white or colored cardstock and create the house ornament OR cut out and use as a template to trace onto other materials.

You will also need materials for decorating. You can draw, paint, marker, collage, etc! See Ideas below.

Instructions

- Cut all the shapes out. You can use scissors carefully or a ruler and exacto knife.
- Fold all the dotted lines. Dotted lines should appear on the inside of the structure.
- You might consider drawing the houses' decorations while still flat.
- Use an exacto knife to cut the bold X.
- When decorations are done and dry, construct, gluing the flap to the inside of the house.
- Cut a string that is doubled over the full length of the house and some extra. Knot on the end and pull through the X shape cuts.
