

Steps to create your .Gif:

1. Create new file 500 pixels x 500 pixels.
2. Copy and paste your 2 images on your artboard (each one will be on a different layer)
3. Open up the timeline Window> Timeline
4. Click Create Frame Animation.
5. Select the 4 lines on the top right of the timeline.
6. Click Make frames from layers.
7. Adjust the time for each frame by selecting each frame and adjusting the time under each one (.5 seconds)
8. Add a color for the background on your background layer.

File> Export> Save for web legacy. **CLICK SAVE... NOT "Done"**

Animated .Gif Assessment

- (5) minimum of 2 frames
 - (5) adjusted the duration for .02 or .5 seconds/ looped forever
 - (5) correct file submission as .gif and it works
- = 15
